BEAR GUARDIAN

Bear Proof Dumpster: Teton Series: MT400

The Teton Series, bear-resistant dumpsters are manufactured from 10 gauge steel, an industry standard for durable front-loading dumpsters. The exterior of the container is washed with a phosphating wash and then coated with 2-3 mils of super durable TGIC polyester coating to the customer's color preference. This finish prevents chalking and color degradation over time.

The T400 model has a 4 cubic yards capacity, perfect for holding even the largest loads. The double access doors are secured with a bear-resistant gravity latch, which prevents the access doors from being accidentally left open. The unloading lid is unlatched by gravity during the dumping operation.

AVAILABLE COLORS

From top left to bottom right: Black, Raven Textured Black, Locker Grey, Classic Grey, Blue, Green, Copper Vein, Medium Bronze, Statuary Bronze, Sierra Tan, Safety Yellow, Regal Red, Redwood, Brown
